DETAILED ACTION

Oath/Declaration

The full name of each inventor (family name and at least one given name together with any initial) has not been set forth.

For instance, there is NOT CLEAR which <u>family name</u> is for the inventor, ie. **Yung** or **Ma**. The record shows **Yung** (for US Pat No. 6,603,344 and Pub No. 2003/0011953) but also **Ma** (for Pub. No. 2003/0185081 and 2003/0189457). **Clarification is needed.**

Drawings

Figure 1 should be designated by a legend such as **--Prior Art--** because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. *Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.*

Claim Rejections - 35 USC § 112

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 10/042,702 Page 3

Art Unit: 2824

Claim 1 recites the limitation "the second state" in lines 21-22. There is insufficient antecedent basis for this limitation in the claim.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 10/250,253. Although the conflicting claims are not identical, they are not patentably distinct from each other because in claim 1, line 13, the limitation of the instant application claim 1 "in response to an input signal" encompasses the same recitation "according to an input signal" of claim 1 of Application No. 10/250,253. Also, both applications disclose a fuse cell comprising: an input terminal, an output terminal, a control circuit, an initialization circuit, a fuse circuit, a latch circuit.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Also Claims 1 would be allowed if a proper terminal disclaimer is filed.

The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for allowance is the inclusion of a control circuit to cause a fuse cell to operate in different modes in coupling with a latch circuit and in response to an input signal.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tran et al.(6,590,825) and Zheng (6,693,481) are cited as of interest.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hien N Nguyen whose telephone number is (571) 272-1879. The examiner can normally be reached on Monday through Thursday 9:30 AM to 7:00 PM..

Application/Control Number: 10/042,702 Page 5

Art Unit: 2824

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Elms can be reached on (571) 272-1869. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
